

**FFFK
Workshop Evaluation
Results**

Year 1

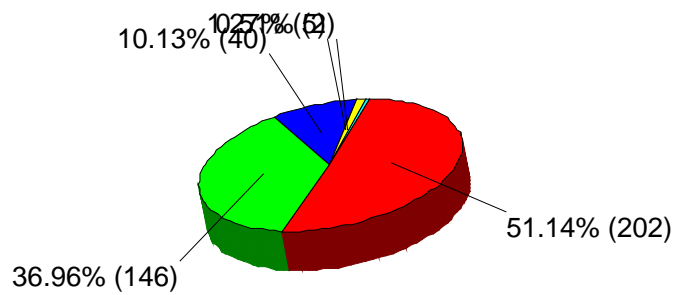

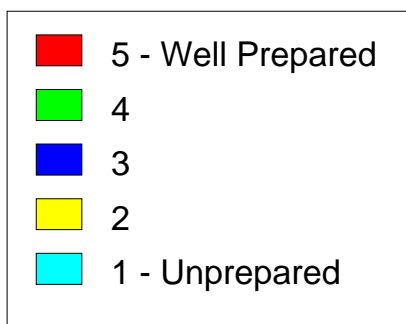

October 1, 2005 to June 30, 2006

Survey Results

The following is a graphical depiction of the responses to each survey question. Additional comments provided by respondents, if any, are included after each graph.

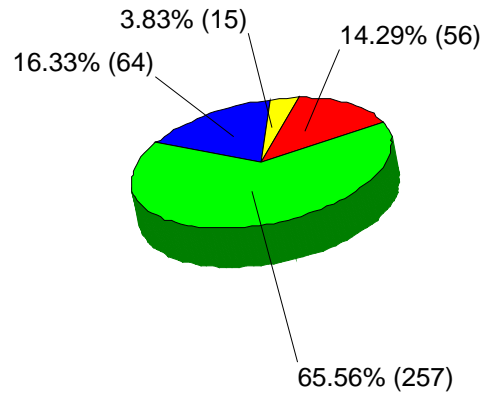

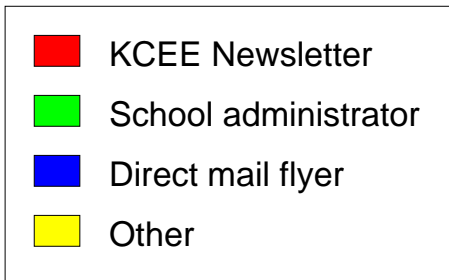

1. Please rate the degree to which you feel this workshop has prepared you to use the Courseware in your classroom.

395 Responses: 10/19/05 - 07/06/06

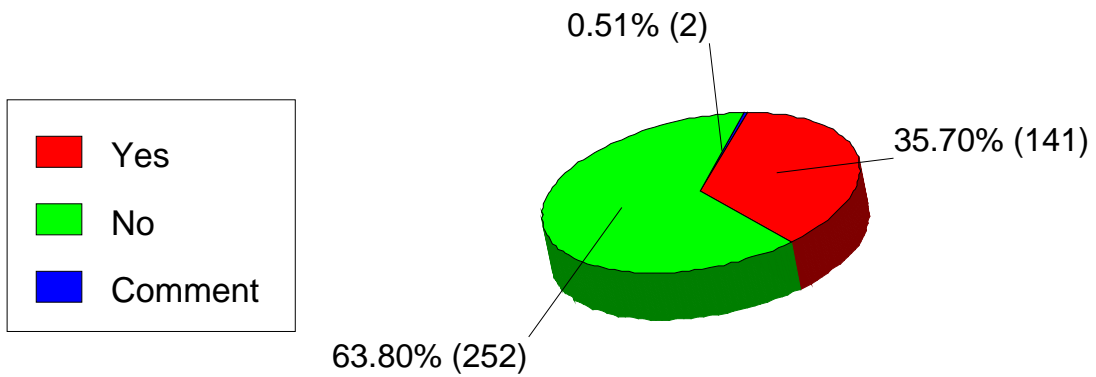

2. How did you learn about the workshop?

392 Responses: 10/19/05 - 07/06/06

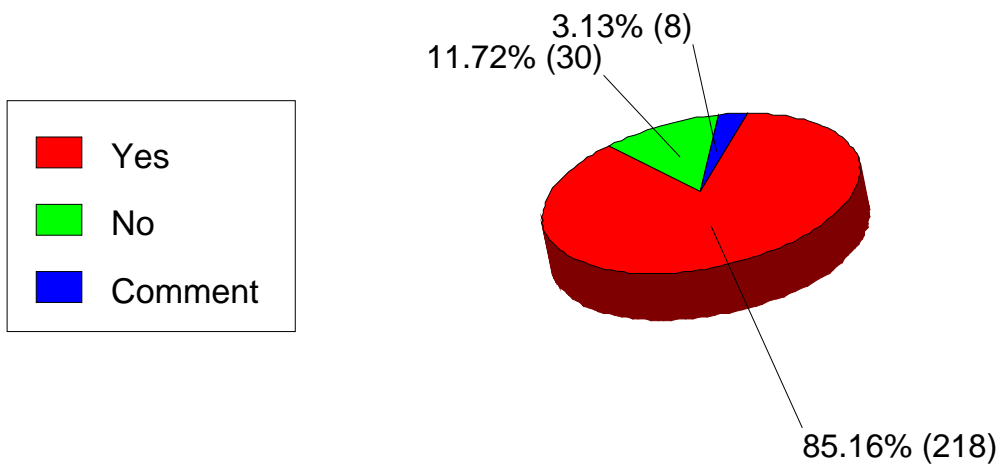

3. Do you currently provide personal finance instruction?

395 Responses: 10/19/05 - 07/06/06

4. If not, will the Courseware change that?

256 Responses: 10/19/05 - 07/06/06

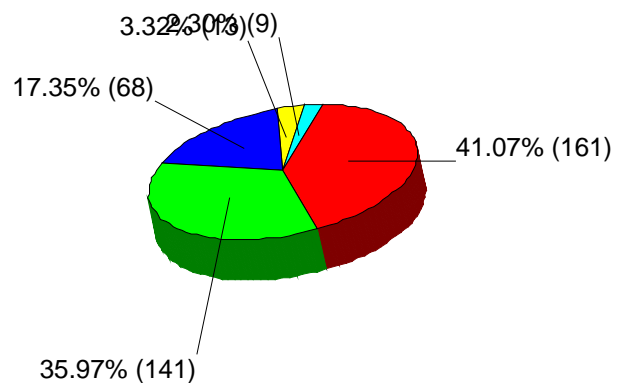

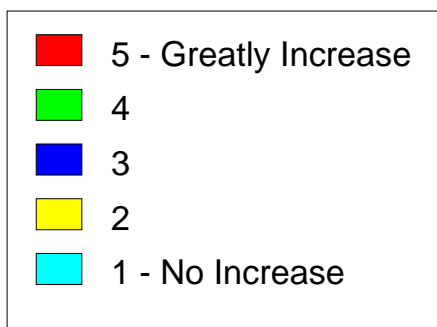

5. Please estimate how many students will receive personal finance instruction from you in the next 12 months.

Over 21,000 students

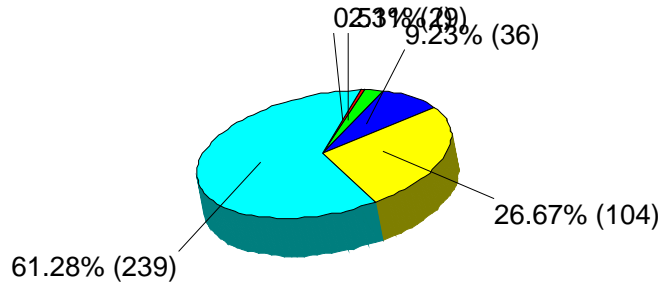

6. Please rate the degree to which you see this Courseware increasing the amount of economics and personal finance instruction you provide your students.

392 Responses: 10/19/05 - 07/06/06

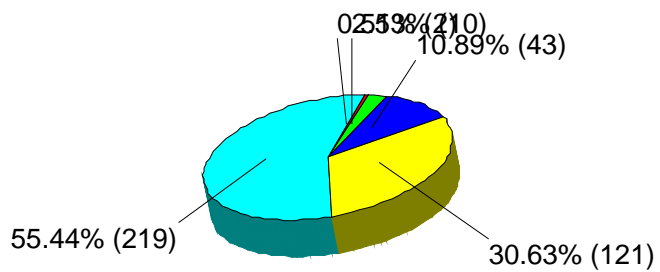

7. Please rank the teaching skills of the presenters.

390 Responses: 10/19/05 - 07/06/06

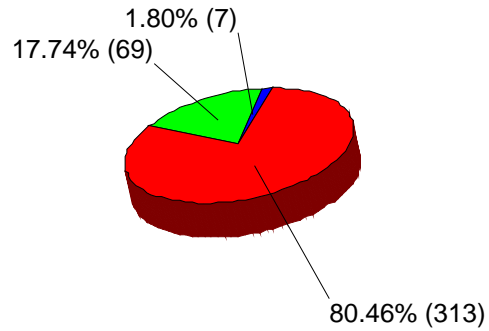

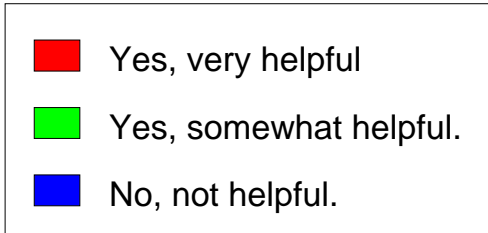

8. Please rank the overall quality of this teacher training workshop.

395 Responses: 10/19/05 - 07/06/06

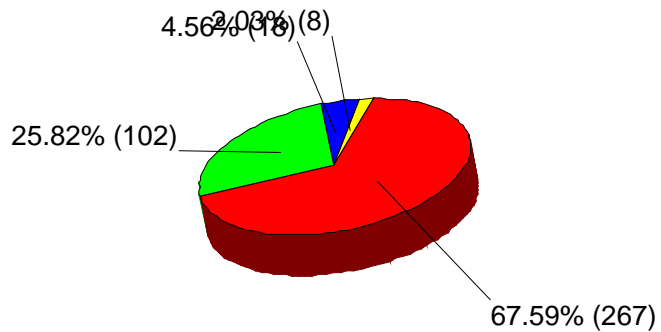

9. Do you think this Courseware will be helpful to you in teaching economics and financial literacy concepts to your students?

389 Responses: 10/19/05 - 07/06/06

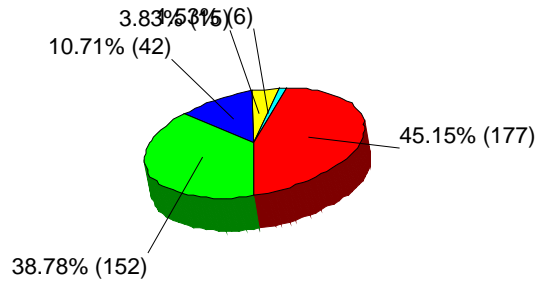

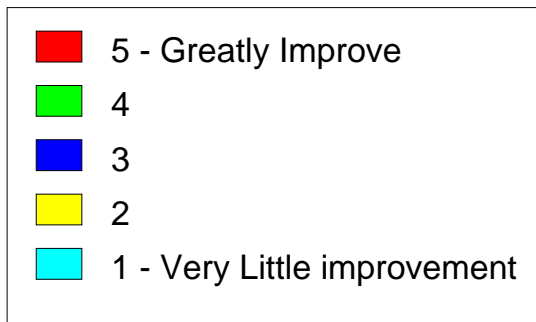

10. How likely are you to use the Courseware in your class?

395 Responses: 10/19/05 - 07/06/06

11. Please rate the degree to which you see this workshop improving the quality of instruction you provide your students.

392 Responses: 10/19/05 - 07/06/06

12. The highlight of this workshop for you was:

An excellent program that I plan to use immediately. I also am going to ask my district to offer this training at an upcoming inservice.

As a teacher, this tool gives me standards, and neat computer, interative programs. I know that my third graders would enjoy it. It also will show me measurable gains

Attractive...should appeal to kids and covers information that according to state statistics, the kids have not been getting

Awesome resource for our teachers, as we move to more online learning.

Awesome! I can utilize this in my classroom right away. Lessons ready to go--I like that!

Awesome! I'm anxious to try it out! One difficulty we will have is access to computers and time to do it. I think the students will enjoy it and will love the format. It meets multiple KS Standards within each lesson.

Awesome. Links to benchmarks will really be helpful in planning.

Being able to search and investigate the cd on my own.

Can be a very important assest for curriculum.

Courseware has some very interesting lessons that help us teach our state standards.

Courseware makes sure we are teaching our Kansas standards and doing everything we can to better their education.

Courseware will be very valuable in my 5th grade classroom next year.

Current information coordinated with the standards and activities ready to go!
Wonderful!

Economic activities and supper.

Enjoyed the activities.

excellent - and yes it will

Excellent courseware will be valuable in my classroom

Excellent resources which correlate Math, Social Science, and Communication Arts curriculums.

Excellent!! I will really enjoy using this in my classroom

Excellent. Stimulating and age appropriate.

exploring the software pertaining to your grade level

Finding resources for my classes

Free software and format..time to work and learn program..Thanks for the pizza.

Getting the CD and working with the features.

Getting the disk and candy:)

Getting the free cd about the economic and math lessons.

Getting the opportunity to explore the program and teacher's guide

Getting to actually do the activities.

getting to play with the software

good for learning the economics vocabulary used in the Kansas State Social Studies assessment

Good ideas to incorporate into my classroom.

Good, age appropriate activities that children will enjoy.

graphics are great

Great - will be wonderful for many of my students.

Great software. Very entertaining. I liked the correlations of the lessons to the standards. Fun and informative activities.

Great tool- I am anxious to use it with my 1st graders.

Great, easy to use, just wish it had a reader section on the tests

Great--very useful for students and teacher. However, the number of computers in the district could challenge the use of the software.

Great. Goes along well with Junior Achievement

Great. It can be a valuable resource in the classroom.

Hands on working.

I am a music teacher and will not use this in my class but I would if I where a classroom teacher.

I am currently teaching an economics unit in my second grade classroom. The lessons were exactly aligned to the indicators that I'm teaching in the classroom. I liked the list of resources that can be used to accompany the lessons.

I am extremely pleased with the software. I found it very user friendly and it will be a valuable resource in the classroom.

I am very excited about this courseware. It is hard to find material on economics for my classroom. It helps me so much to actually work through the program so I will know how to use it in the classroom

I am very excited to use this in my classroom! I think it will help my students understand choices and limited resources a lot!

I believe that the information on the CD would be a valuable asset for any classroom teacher. At our school, problems arise because of the lack of computers for every child on our classrooms.

I believe that the information presented in this workshop will benefit me greatly in the near future. It will allow me with much needed resources, in order for me to teach economics to my elementary students in a more fun way.

I believe this will support my math instruction and engage my students. It gives me a convenient way to teach students money concepts in realistic situations.

I definitely think it will be valuable. It's easy-to-use and has interesting graphics!! And it is applied directly to the state standards!! yahoo!

I did like it, but do not know when I will have a chance to use it.

I do believe it will be a benefit in my classroom. It merges several different subjects into one task and is very bright and interesting for the kids. I look forward to using it.

I do like it. I will use it in my classroom with my students this year.

I do think it will be helpful but, for 1st graders the questions really need to be read to them.

I enjoyed the program. I think this is exactly what I need to help my 4th & 5th graders understand economics. The hands on individualized instruction is what they need.

I enjoyed this economics class. I learned how to incorporate everyday events about economics.

I enjoyed using the software but am a little concerned about the level of cartoon graphics for 8th graders. Also, have some kind of note-taking system in place for older kids to keep vocabulary, concepts, etc.

I feel that this software will be very helpful at the lower levels of school as well as the High School.

I feel that this will be a valuable tool for teaching as it deals with concepts in a different way other than textbooks/ manipulatives.

I feel the CD I received will be helpful, and I plan to use this in a center. Some of the material is above my kids but the parts that apply to K will benefit my class.

I feel the software will be a valuable tool to help teach the standards I am responsible for teaching.

I find this courseware valuable to me as another tool to use with my ESOL students.

I found it easy to use and I think the kids will like it too. It is simple yet fun and educational.

I have not decided

I like it - it matches our standard for the 4th quarter so I will use it right away

I like it and think it will be very useful.

I LIKE IT AND THINK IT WOULD BE INTERESTING TO MY STUDENTS. ALSO IT WOULD HELP ME IN MY PLANNING.

I like it and will use it!!

I like it, It will be useful in helping me teach economic concepts.

I like it. I think it can be very valuable, if you do a proper pre-test so you can find the correct grade level your students are at.

I like it. It is easy to use and I liked the presentation for 3rd graders.

I like that it is updated. I will use it along with some of Econ and Me.

I like that it is interactive and has so many resources for the teacher.

I like the courseware, and kids will think it's fun. I would use it if I had computers for student use in my classroom

I like the courseware. I looked at the third grade level, and it seemed very appropriate for that grade level. I am planning on having it installed in our computer lab.

I like the courseware. It reads the material for non readers. It has low enough lessons so that students can be successful

I like the friendliness of being able to use the software. It is easy to use and I believe the students will love it!

I like the graphics and the fact that it is read to the students.

I like the language that it provides and that it explains the task thoroughly.

I like the new courseware and think it can be a valuable asset for our students. It should appeal to the students and provide them with valuable information on economics.

I like this program. I think that it is interesting and very interactive for the kids.

I liked it a lot, especially how it is tied to the standards and the lessons that are provided. It will be valuable to me as soon as I get comfortable with it and decide how best to utilize it. (2 responses tallied)

I liked it very much and think it could be very worthwhile to students in elementary and through high school.

I liked it. I think it would be very valuable in the classroom.

I liked it. I think it will be valuable to me.

I liked it. I think my students would like it.

I liked the CD- the kids will really buy into it I think! I think it will be useful during economics lessons.

I liked the way the lesson plans were laid out.

I love it! I think it will be very valuable. I'm excited to get back to my class and try it out!

I love it! I think it will be a great resource for educators.

I love it, it will be very helpful

I love it, the episodes are great!

I love it. It is kid and teacher friendly. It supports the standards required by the state of Kansas.

I love it. and will use it with students.

I love the CD and the website (+ links) and as long as I can be creative with my time, I definitely think it will be of value to me.

I love the graphics it seems really helpful for PreK students.

I love the interaction and yes it will of great value in the classroom.

I love the new courseware and think it will definitely help in our curriculum. The fact that we can load it on the school server for all our colleagues is great as well as the fact that it is free.

I love the program and think it will help in my classroom.

I love the whole concept and all of this information is extremely valuable.

I love this new courseware. I think it will be a fun way to teach children about Economy.

I loved the episodes, they are great and the kids will love them! The teachers guide is really helpful as well.

I need more time to explore the courseware, but I think it will be valuable.

I plan to use it with students in my classroom.

I really appreciate this courseware and will use it in my classroom. The format is both teacher and student friendly.

I really enjoy the interactive characters and real life problem solving.

I really enjoyed learning about the courseware and feel it will better my students in the economic standards with enthusiasm.

I really enjoyed this workshop. Got lots of good ideas for classroom.

I really like it and think that it will be very useful in the classroom.

I really like the courseware and think it will be very motivating to students and a great way to teach the standards in Economics.

I really like the courseware, think that it is teacher friendly. The students will really like the activities on the computer. I would really have liked to have had this earlier.

I really liked it. Thanks! I believe I will use it with my students.

I really liked the books and cd-roms we were given. The 3-5 teacher guide looks really valuable, however without the student book it is impossible to use it to its full potential.

I really liked the computer program and activities that the students complete within the program.

I really liked the new courseware and think my students will enjoy it. We really needed good quality software in the area of economics for our students that would help us meet our state standards in that area.

I really liked the software and abundance of links related to economics/levelized lessons, etc.

I see this very valuable for a classroom teacher. I however am not a classroom teacher. I am a support teacher.

I think I may use it in my 7th grade career class.

I think I will be able to incorporate it into my social studies curriculum. I like the way it shows which standard each activity matches with.

I think I will be able to use some of this info in my first grade classroom.

I think if the kids are taught to use it in the computer room it will be good. I question being able to use it in the room with only one computer.

I think it has a lot of interesting ideas. Certain parts I will be able to use.

I think it has a lot to offer. Need more time to really evaluate.

I think it has potential. Parts of it need more development. I'm concerned some of it is too high a level for the majority of middle school students. I also see if it is used in lower levels students will be more apt to succeed at this level.

I think it has wonderful information and would keep kids interest.

I think it is an Awesome tool! The kids will enjoy working the different episodes and learning about economic issues.

I think it is extremely well thought out. I know my teachers will use it as a resource for teaching economics to their students.

I think it is great and the kids will be able to use it easily. I like the idea of the CD and the ease of integrating it into the whole curriculum.

I think it is great material, but I am a para so I will probably not have the opportunity to use it.

I think it is great!

I think it is great! As a teacher of special education and multiple grade levels it will very helpful! I can't wait for the students and staff to use it!

I think it is great. It gives so many concepts but yet is so simple.

I think it is invaluable! Teachers will want to use it to teach such an important lifeskill.

I think it is pretty nifty! I really liked the interactive, animated lessons. It looks like it will be motivating for our students.

I think it is valuable but computers are not accessible to kindergarten at my building.

I think it is wonderful. I am a new teacher and I was at a loss to know where to even start teaching economics. I know the teachers and administration will be thrilled with this new program. So much so that I hope they will reimburse my tuition!!!!

I think it looks interesting and fun for kids. I need to do some ore investigating before I use it with children. I do think I'll be able to use it.

I think it was very easy to use and interesting. It will appeal to children. I also was glad to see the correlations.

I think it will be a good resource especially for my younger students.

I think it will be a great learning tool for the students.

I think it will be extremely valuable to me as well as my classroom. It is very interactive and kid friendly. Most of all, I like how everything is related to the standards. It is very easy to get around and very engaging.

I think it will be extremely valuable.

I think it will be great. It appears to be easy to use, targets the standards, should keep student interest, and eliminates the need for teachers to gather resources (which will save so much time).

I think it will be more valuable to a classroom teacher than a gifted education teacher.

I think it will be motivating for the kids.

I think it will be quite a valuable resource. What a fun way to introduce kids to these concepts!

I think it will be useful for us. It is updated and will be interesting to kids.

I think it will be valuable for my students because it will address the different needs of each student.

I think it will be valuable since I have nothing very little to teach economics with at this point.

I think it will be valuable. I am anxious to try it on my first and second graders.

I think it will be very valuable because it has the standards being taught.

I think it will be very valuable. I am a math teacher and this way I can go over the math standards and concentrate on the Economics standards at the same time while giving valuable real life experience to my students

I think it will be very valuable. We have new economics objectives added to our district curriculum to better match the state standards. Textbooks on the elementary level do not address economic education, so teachers must find their own materials. This courseware will be helpful in teaching economics.

I think it will make learning about budgeting and economics fun and more meaningful to the families I do budgeting with.

I think it will work well with our curriculum and the kids will enjoy it. I like how the concepts are reinforced throughout the videos. The only thing that is unavailable is the computers in our district.

I think it would be helpful to teachers in my schools. There are still some errors on the disk... will we get an updated version?

I think it would be interesting to the students. My only concern is that Kindergarten does not have computer lab or computers in the classroom.

I think it's great and I will use it. It's informative and entertaining for the kids.

I think it's valuable, but at this point I have no economic indicators prescribed to me to teach.

I think it's very user-friendly.

I think that I will be able to use it and I like that the lessons are already created.

I think that I will use this with my students to help reinforce my economic standards

I think that it could prove to be a good thing for students.

I think that it is very kid friendly. I think that my teachers will enjoy the software.

I think that it looks great. I like that it allows my kids to work through the lessons on their own. A child could really move at their own pace.

I think that it was very valuable

I think that it will be a good resource that I can use as a reinforcement tool for my econ unit.

I think that it will be useful in my classroom. I plan to use it with our Social Studies units, language arts (incorporating our basal stories) and math. It is great to have the software available to use during the summer to make lesson plans for the fall.

I think that it will be very beneficial in my classroom. I hope to implement it this fall utilizing FHSU interns. I do think that there are a few "flaws" in the software (for lack of a better term). I would be happy to be a proofreader for the Kindergarten or any level the next time you need them.

I think that it will be very valuable because of the multiple grade levels that it offers and it reads to students.

I think that it will enable my students to pre-test and then learn at their own pace. Gifted students need to move along at their own pace and get frustrated if they are not allowed to do so.

I think that the kids will love it. It is amusing, graphically interesting, and the tune is catchy!

I think that the new courseware will be a wonderful supplement to our Social Studies curriculum. I think that it will be tremendously valuable to my students because it will be both fun and educational!

I think that this is a wonderful tool to help students learn information about financial situations. I think that it is great that it is aligned to our state standards.

I think that this is wonderful!!! We are needing to teach Goods and Services for our KPR, and this fits the bill. What a wonderful program

I think that this was great for my teacher

I think that this will be used frequently during my economics unit. It will add value to the curriculum being taught and be exciting for the students.

I think the course work will be very useful in the classroom and I am excited that it is aligned with the standards.

I think the courseware is great. It will be very valuable as a teaching tool in my classroom.

I think the courseware is great. Yes , it will be valuable to us as first grade teachers.

I think the courseware is terrific. I will use it more when I have computers in my room that are newer (May 2006). The students will have fun learning economic topics because of the cartoons and fun interactive lessons.

I think the courseware is valuable in introducing new vocabulary and concepts to students and giving them understandable examples of how the concepts of economics are played out every day. I do not expect to use this software because in my job as a Para educator I do not present new lessons to students.

I think the courseware is valuable, and that economic education is important. I would like to see entrepreneurship (sp), and more emphasis on "the trades" as good paying "jobs". Everyone won't be going to college

I think the courseware looks good. I think it will be a good tool to use as a teacher, and I especially like the math problems (I'm a math teacher, and it's great to have some problems right with each lesson).

I think the courseware was very beneficial and I think the teachers will think anything (software in specific) for free is great!

I think the courseware will be very valuable and fun for the students and teachers to use.

I think the courseware will benefit the students and be helpful for the teacher.

I think the coursework is great. It will be a way for children to incorporate what they have already learned in the classroom and it is fun. Children learn better when information is presented in a fun way.

I think the coursework will really help us teach economics. I remember when we started preparing students for the first Social Studies assessment and opportunity cost was a new term for me. I am probably not alone. Thanks for offering this material. Teaching our students to view money as an asset instead of just something to be spent is a grand idea. Thanks.

I think the interactive software is a great way to help students learn, revisit, etc the different areas that they will be assessed on.

I think the kids would really enjoy working with this information and I think it would be valuable for them.

I think the kindergarten level needs some tweaking, such as, sound for all parts.

I think the new courseware looks great--very user friendly!

I think the software will be a valuable tool for all teachers.

I think the software will be a valuable tool to use in my classroom.

I think the software will walk the students through the different aspects of economics. Very helpful.

I think the students will enjoy this interactive course.

I think the students will like using it and it is always nice to have a new exciting lesson plan already done for you.

I think the workshop was rather interesting. I would like to do some kind of integrated unit within our team.

I think there is valuable information that students need to learn. However, I do think the concepts (and math problems) are too difficult for the grade level specified.

I think there was much information that would be valuable for elementary teachers; I am a high school teacher

I think this courseware is well put together. It provides ample opportunity/explanations per grade level for a variety of interactive activities.

I think this is a great interactive tool to use in our school system.

I think this is an exciting and motivational way to teach about economics. I will use it either in my classroom or going into the general education classrooms in my building.

I think this will be a valuable tool to help my students understand economics better.

I think this will be beneficial to my special needs students.

I think this will be valuable, especially for the various levels of learners I teach

I think this will be very beneficial to my unit. I love the cd and think the kids will Love it to. I like how you have integrated math into the cd.

I think this will be very valuable in many different subject areas.

I think this will provide some concrete examples of how economics works for my first graders.

I thoroughly enjoyed this evening's presentation and think that it will be very useful. I told my students today that I was going to get some new ideas this evening that we can use to have fun once our state tests are over!

I thought it was awesome and since I teach social studies it will be great for my classroom. Very user friendly even for me!

I thought it was great and a useful teaching tool.

I thought it was great and very user friendly. Loved the pre and post test.

I thought it was great. I would like to use it as a teaching tool with the smart board and then have students use independently.

I thought it was very informative and once I become more use to it could be very useful in class

I thought it was very usable.

I thought that the courseware is very user friendly for children. I think that they will love using it and they will also get a lot from it. As a teacher, I love how the standards are identified and it ties in several subject standards at once.

I was impressed by the courseware and how well it matched Kansas curricular standards. It will be very easy to assimilate into my current lessons. I believe I will also be able to correlate it in several areas across the curriculum (ie reading, language arts, math, social studies)

I will be able to integrate this with what I have been doing. It will be helpful as the district has a push for increased technology in our classrooms.

I will be able to use some of the courseware in my classroom

I will definitely use it in the workstations that are in my classroom

I'm excited to present this courseware to other teachers because of how well it aligns with the standards, the fact that it's technology driven (kids love that!), and it will give teachers an awesome resource to address personal finance.

I'm going to share this with other teachers

I'm very excited about the courseware. It will make my planning much easier.

If I were a regular education teacher this would be a great resource. i will be able to utilize it with my "special ed" students but probably not to the extent of reg ed teachers.

Interesting. Yes.

It appears to be very appropriate for social studies courses and math courses. I think it would prove valuable.

It appears to me to be very user-friendly, extremely comprehensive and love that it is linked to the standards and comes with what appear to be easy to execute assignments that don't take a large amount of class time to do.

It can be valuable for my students. I like the fact that it has music, and decision making for the children

It has some well-written skits that will keep the students engaged. It introduces and repeats the vocabulary enough so the students get it.

It is a great program and will meet many objectives in our curriculum. I am concerned that we don't have the computers in our school so that all the children can do the program.

It is a great tool to engage students in the study of economics. Students are very motivated by computer programs.

It is a very well put together program. Usable.

It is an excellent program that goes with the standards I am teaching at this time.

It is excellent. I will use it in my classroom as it will fit well with my current mini-grant program.

It is going to be very useful and helpful.

It is good. It will be valuable to me.

It is great! I do think that the math problems for the 6th grade software may be a little too advanced.

It is helpful to my students to have the speech component.

It is soooo cool. i can't wait to use it

It is valuable, but could have more checks along the way for comprehension check and review.

It is very useful and creative I will definitely be using this in my class this week.

It is very user friendly. Yes, it will be valuable.

It is very valuable because it will teach our students information that is difficult to have time to teach in the regular classroom.

It is wonderful. I believe it will be very valuable to me.

It is wonderful. I will use it with the kids as a part of our economics unit.

It looks great!

It looks pretty neat and easy for kids to follow.

It looks very interesting, and it will help to know for sure when we use it with the children.

It looks wonderful!

It seems like just the tool we need to cover the state students at 2nd grade.

It seems to be okay. Will have to work with it some more.

It seems to be very kid friendly. I am excited to try it out.

It user friendly and correlated well with standards. It would be valuable to us, especially because we teach about U.S regions and it covers the economic part.

It was an interesting experience, it has a lot of potential.

It was easy to follow and the Kids will enjoy using it.

It was fun and lots of hands on time. I have ideas of how to use this program in my classroom to enrich the learning in social studies and math.

It was great and beneficial to any class.

It was great! I really needed just the basics to start my economics units with. I was ecstatic to learn that I can install the disk on my server at school!

IT was teacher friendly, the bench marks were great.

It will be an engaging tool to help teach math.

It will be helpful for a few students, but until the answers are read to the students I will have to read it to them which I really don't have time to do.

It will be helpful for a few students, but until the answers are read to the students I will have to read it to them which I really don't have time to do.

It will be valuable for my first graders to learn about economics concepts.

It will be valuable to teachers.

It will be very helpful.

It will be very valuable to all classroom teachers.

It will be very valuable to the classroom teacher

It will help with the vocabulary that will need to be taught. The actual presentation of some of the lessons seemed slow.

it will not help me in my field of expertise

It's chock full of info and resources. Yes, it will be quite valuable.

It's great for teachers of the gifted to use either with groups or individuals!

it's great!

It's great- I think that it could be very valuable if you had only more time

Looks great--It will be valuable in my classroom for teaching the Economics curriculum

lots of information to go through in less than one hour

Love it!!!! It is so easy to use that I will use it at the computer center with my PRe-K kids.

Much of the information is going to be very useful]in the classroom

My initial response is very favorable. It seemed too easy, but I can notch it up some grades if I need to. I like it that you have pre- and post- tests so I can know if it really is too easy.

Need this in our school for kids

Not applicable to my teaching field

Okay I like Econed videos better.

overwhelming

Previewing software for financial foundations for kids. The CD can be loaded on the server at school

seeing and using new software

Seeing something new

Seeing the Financial Foundation software

Teacher friendly. Little set-up required. Pre/Post Test very helpful.

The 6th grade activities follow along with the social studies requirements. The students will enjoy doing the activities more than spending time reading out of the text.

The CD

The CD to teach Economics and S.S.

The courseware is great and it will make teaching economics easier for the teacher

The courseware is user friendly. I think it is important information for children. It would fit into the social studies curriculum.

The courseware is very user friendly and directly correlated to the standards. It is also entertaining and educational for the students. It will be valuable to me as I teach the students about U.S. regions and the economy in those regions.

The courseware is very user-friendly and kids will love it. It's easy to understand and kid-friendly graphics.

The courseware looks great and will fit so well into our curriculum

The courseware looks very user friendly and motivating.

The courseware seems very useful. It will engage kids.

The courseware was absolutely wonderful. I think it will be extremely valuable in meeting the needs of my students in the area of economics as well as the standards.

The courseware was great. I will use it.

The curriculum that I received to night will be very useful. I like the way that the students will be able to use technology to complete these lessons. I also feel that they will keep the students actively engaged.

The lesson plans and activities matched to the standards will be a very valuable tool.

The new coursework will be a terrific tool to use in the classroom to enhance learning. It will be a great tool to reinforce skills taught.

the opportunity to use the software and become informed

The program is very comprehensive. I think that teachers will find it very easy to use and the students will enjoy it as well as learning very important information.

The software is great and looks very useful

The software is great and very user-friendly. I think it will be easy to incorporate in my classroom. The students should be able to learn the material quite easily.

The software looked fantastic. It has materials that would allow students of any ability or skills to plug in, work at their own rate, and learn the math, social science, and economics from the program.

There are good materials that will be valuable in teaching these concepts.

There is a lot of information of which I'm sure much will be useful. At the time I am on overload and feel like I need to go home and sift through the information to decide what I can incorporate into my classroom.

There seems to be a lot of valuable information that is presented in a motivating way for students. It is easy to see that the creators put a lot of work and effort into the program and I am excited to put it to use.

This courseware does a good job in making the lessons very easy to teach. The video clips will be engaging for students. The correlations to the standards is a very important component.

This courseware has been very informative. I feel that I will be able to use the provided materials in my classroom and keep my kids interested at the same time. It is wonderful that the materials are along the lines as the state standards.

This courseware looks fun and exciting. I can't wait to use it.

This courseware was excellent. There looks to be many things that will be useful in my classroom.

This courseware will be very beneficial to me as a teacher because of it's resources and accessibility for students and teachers.

This courseware will be very engaging to the students. It will be valuable in the classroom.

This exciting. I'm looking forward to using this courseware immediately in Life Skills class.

This information is very valuable. I'm starting a economics unit and this will be a great resource to use in my classroom. I would like to make it so that my students will be able to work through the CD program.

This is an awesome program. I will be able to go back to the classroom and use it right away.

This is excellent resource that I think can be shared across all grade levels and received very well by the students. It seems to be age appropriate, aligning with the grade level.

This is really great! I know I'll be using it in my class next year. I especially like how you coordinated the standards to the lessons.

This is wonderful> I am SOOOOOOO excited about using this in my classroom.

This looks very helpful for teachers.

This tool can be very valuable to our students. We are always looking for ideas to get these standards into our curriculum. Yea.

This was a great time. Very helpful. Thank you very much.

This was a very good workshop.

This was great and it's very user friendly I love how we can use it in our school!

This was great! I'm excited to use it with my class.

This will be a very valuable addition to our curriculum

this will be great to help my students understand how our economy is based

This will be very beneficial to my students and I.

This will be VERY helpful for me, especially since I teach both Math and computers. I will use this CD for all of my K-7 computer classes! THANK YOU!

This will be very useful in my classes. It is teacher friendly, while high student interest.

This will be very valuable teaching material in my classroom. All of the standards and benchmarks are covered and connected to math and language arts.

This will be very valuable to me as I am the technology resource teacher

Time to look through the CD-ROM and the websites

To actually work the program to see if it would work for the children that I teach.

User Friendly

user friendly; interesting; grade appropriate

Using the interactive CD for financial foundations! Exploration

Valuable source already linked to KS standards

very child friendly. great concepts, very valuable to teacher

Very colorful and user friendly, great sound quality, high interest. I did think the math items would work better with whole group, rather than individual.

very comprehensive

Very easy to use for teacher and student. I am looking forward to including it in my upcoming economics lesson. The kids will really enjoy the computer work!

very good (2 responses tallied)

Very good--I'll use in the classroom

Very good. I am anxious to study and learn more from the disc and on line.

Very good. I'm anxious to try it with my second and third graders.

Very informative and valuable for the classroom.

very informative, and should prove challenging to students K-8th, especially in math

very interactive for the students and great for ELL students as well

Very interesting

Very interesting and quite useful

very interesting, something America needs. since my students are hard of hearing and have delays in language, hearing the computer voice may be difficult and keeping up with the captioning may be difficult for some of the student also. i'm also excited to use some of the resources for personal financial assistance/advice.

Very interesting. I want to explore it further and then see how a couple of the students do on it. Seems great.

Very interesting. Will use this with my class. Set to standards! Easy to use

Very useful in teaching of social studies.

Very useful. Definitely provides a different approach than just lecture.

Very user friendly Very user friendly

Very user friendly. Like the simplicity. Addresses important concepts and the standards. Lots of resources. I am a reading teacher though and will not use it in my very prescribed program. I will keep the information in the event that I will ever go back into the classroom. I will also share with my own children.

very valuable, these are topics that are not addressed enough in our curriculum, and this is a new and exciting way for them to be introduced and practiced

Very Valuable. Love the vocabulary and examples.

very valuable. Love the vocabulary and examples.

Viewing the Financial Foundations software.

We like the activities and think that they will be useful in the classroom.

We liked it very well. There are neat ideas.

Well done

When it was over!

Wonderful product!! *user friendly * contains a great deal of information * teachers very important concepts * many useful resources for teachers and the general public * address state and national standards and benchmarks

Wonderful. Excellent easy to use tool for the classroom

Wow! I really like it. It's very sophisticated. I'll have to spend a considerable amount of time getting acquainted with it, but see great possibilities with my high school sped. students.

WOW! I think this will be a great tool to introduce and reinforce economic concepts with students of all ages. I can't wait to get it installed and start using it.

Yes

Yes I think it will be of valuable to teachers in the future.

Yes I think it will be valuable.

Yes loved it!!!! Awesome, will meet the needs of all students.

Yes the courseware was excellent and I am excited to use it in my classroom.

Yes, I am anxious to try more of it. I like the idea of starting at the Kindergarten level. Hope it is not too difficult for my special education kids.

Yes, I do believe that it would be valuable to me as a teacher. I especially like the teachers guides that are available and the format that is used for it.

Yes, I do believe the courseware will be useful. There are many activities to choose from!

Yes, I feel it will be valuable to me as a teacher. Computer access continues to be a hurdle, however.

Yes, I plan on using it a lot.

Yes, I think it will be very helpful

Yes, I think it would be very valuable.
